

Team effort distribution report

Assignment number: 1

Assignment Team number: 5

GitHub URL:

Brief description of work distribution (max. 200 words)

We divided the work of the assignments by creating Github issues for each sub question. These issues could then be split up in smaller, parallel tasks, which people could do independently. We all therefore contributed approximately equal time to the assignments.

The report was mainly written by Xuening and Juliette, with Wessel contributing a smaller amount of text.
